of the ore went at \$47. The ore buyers, still bent upon breaking up the Zine Miners' Association, left much ore in the bins. In Webb City alone thirty cars were left unseld. If all had been sold the district value would have crowded close upon \$300,000. The spelter market is still strong and ruled nominally at \$6.60 to \$5.55 at St. Louis, but little trading was responsed. Advices from Pittsburg say that sales have been made at \$6.85 but the ionnage does not amount to a great deal. Makers seem to be very well sold up, and there is no pressure to sell. The general situation is very strong and there is no the least indication of any falling off in demand for the metal, or probability of weakening, in price.

This is good news for the mine and it means that ore will continue to sell at prices varying between \$10 and \$50 indefinitely. In truth, judging by, not only the domestic, but the foreign markets, it is reasonably sure that prices will not go below \$40 this year. The boom still continues unabated and much capital is coming in, especially from Boston, which just now is builling the market in zine stocks. The price of lead ore was unchanged, selling all week at \$25. MUSKOGEE, I. T. May 28 .- (Special.) A. J. It is said that the Oklahoma Populists are backing Pearson and hope that his scheme will work so that the telegraph tain no alcohol and are free from narcotics tain no alcohol and are free from narcotics it may be depended upon that the statement is exactly true. It is the same in reference to other matters pertaining to the World's Dispensary Medical Association. Nothing is overstated, and Dr. Pierce owes his large success and enormous business as much to his absolute integrity of word and deed, as to the genuine healing value of his medicines. In a recent interview Dr. Pierce said with reference to the suits at present being prosecuted: "We are determined to stop the publication of the false formulas of our medicines.

Formulas Never Right.

"These formulas are never even approximately right, and generally their falsehood extends, not merely to the inclusion of alcohol and narcotics, but to mis-statements concerning every reputed ingredient of the medicines. A notable example of this falsehood was recently brought to our notice. A physician at the head of an institution, known throughout the United States, publishes a so-called health guide. In this book, among the formulas of other medicines, are given what purport to be the formulas of Dr. Pierce's Golden Medical Discovery and Favorite Prescription." Not one of the medicinal ingredients named in these false formulas enters into the composition of Dr. Pierce's medicines. There is no excuse for such scoundrelism, and no explanation of it except original sin. This man has a laboratory at his disposal: he could have had an analysis made had he wanted one. He probably did not want one. A lie was caster than the truth, and a great deal handler for his purpose.

"It would be interesting to know how far the rest of his book may be relied upon. If the remainder of the information it supplies is as utterly unreliable as these formulas, it will be a case of the blind leading the blind to fall into the ditch. As it is a ensual glance at the book recalls that famous remark, made concerning another of the brotherhood of 'stuffed prophets'—The gentleman relies upon his imagination for his facts and upon his memory for his wit."

"We are going after this kind of man. We are going after this kind of man. We are going to show up the unprincipled lars, who lead the name and influence of an honorable profession to give weight to the falsehoods they utter. In doing this we are performing a duty to the public, as well last to ourselves."
